

PROF. SÉRGIO CONCLI GOMES

EXERCÍCIOS DE ISOSTÁTICA

3^a edição 1982

1. Estaticidade	Ex. 1
2. Reações	Ex. 2 a 36
3. Solicitações fundamentais	Ex. 37 a 44
4. Treliças planas	Ex. 45 a 63
5. Treliças espaciais	Ex. 64 a 72
6. Vigas com carregamento transversal	Ex. 73 a 94
7. Pórticos com barras retilíneas	Ex. 95 a 103
8. Arcos e pórticos com barras curvas	Ex. 104 a 116
9. Grelhas	Ex. 117 a 122
10. Estruturas espaciais	Ex. 123 a 125

EXERCÍCIOS DE ISOSTÁTICA

- 1) Calcular os graus de estaticidade total, externo e interno para as estruturas das figuras 1 a 10.
- 2) Calcular as reações externas na viga em balanço da figura 11.
- 3) Calcular as reações externas na viga simplesmente apoiada da figura 12.
- 4) Calcular as reações externas na viga simplesmente apoiada, com um balanço, da figura 13.
- 5) Calcular as reações externas na viga simplesmente apoiada, com dois balanços, da figura 14.
- 6) Calcular as reações externas no arco engastado da figura 15.
- 7) Calcular as reações externas no arco simplesmente apoiada da figura 16.
- 8) Calcular as reações externas no arco simplesmente apoiado da figura 17.
- 9) Calcular as reações externas no pórtico da figura 18.
- 10) Calcular as reações externas no pórtico da figura 19.
- 11) Calcular as reações externas no pórtico da figura 20.
- 12) Calcular as reações externas na estrutura plana da figura 21.
- 13) Calcular as reações externas na estrutura plana da figura 22.
- 14) Calcular as reações externas na estrutura plana da figura 23.
- 15) Calcular as reações externas na grelha engastada da figura 24.
- 16) Calcular as reações externas na grelha engastada da figura 25.
- 17) Calcular as reações externas na grelha apoiada da figura 26.

- 18) Calcular as reações externas na grelha apoiada da figura 27.
- 19) Calcular as reações externas no arco trirotulado da figura 28.
- 20) Calcular as reações externas no pórtico trirotulado da figura 29.
- 21) Calcular as reações externas no pórtico trirotulado da figura 30.
- 22) Calcular as reações externas na viga Gerber da figura 31.
- 23) Calcular as reações externas na viga Gerber da figura 32.
- 24) Calcular as reações mútuas na rótula interna do arco trirotulado da figura 33.
- 25) Calcular as reações mútuas na rótula interna do pórtico trirotulado da figura 34.
- 26) Calcular as reações mútuas nas rótulas internas da viga Gerber da figura 35.
- 27) Calcular as reações externas na estrutura rotulada internamente da figura 36.
- 28) Calcular as reações externas na estrutura rotulada internamente da figura 37.
- 29) Calcular as reações externas na estrutura rotulada internamente da figura 38.
- 30) Calcular as reações externas na estrutura rótulada internamente da figura 39.
- 31) Calcular as reações esternas no pórtico trirotulado da figura 40.
- 32) Calcular as reações externas na viga Gerber da figura 41.
- 33) Calcular as reações mútuas nas rótulas A e B da viga Gerber da figura 42.
- 34) Calcular as reações externas na estrutura rotulada internamente da figura 43.

- 35) Calcular as reações mútuas na rótula interna do arco trirotulado da figura 44.
- 36) Calcular as reações externas na estrutura rotulada internamente da figura 45.
- 37) Calcular os módulos das solicitações na secção S da estrutura da figura 46.
- 38) Calcular os módulos das solicitações nas secções S_1 e S_2 da estrutura da figura 47.
- 39) Calcular, na estrutura da figura 48 os módulos das solicitações nas secções S_1 e S_2 .
- 40) A peça cilíndrica da figura 49 tem 40 cm de diâmetro e pesa 100 Kgf por metro de comprimento. Calcular os módulos das solicitações nas secções S_1 e S_2 .
- 41) Calcular os módulos das solicitações nas secções S_1 e S_2 da estrutura trirotulada da figura 50.
- 42) Calcular os módulos das solicitações nas secções S_1 e S_2 da estrutura da figura 51.
- 43) Calcular os módulos das solicitações nas secções S_1 e S_2 da estrutura da figura 52.
- 44) Calcular os módulos das solicitações nas secções S_1 e S_2 da estrutura da figura 53.
- 45) Calcular os esforços normais nas hastes da treliça plana da figura 54.

- 46) Calcular os esforços normais nas hastes da treliça plana da figura 55.
- 47) Calcular os esforços normais nas hastes da treliça plana da figura 56.
- 48) Calcular os esforços normais nas hastes da treliça plana da figura 57.
- 49) Calcular os esforços normais nas hastes da treliça plana da figura 58.
- 50) Calcular os esforços normais nas hastes da treliça plana da figura 59.
- 51) Calcular os esforços normais nas hastes A, B, C e D da treliça plana da figura 60.
- 52) Calcular os esforços normais nas hastes A, B, C e D da treliça plana da figura 61.
- 53) Calcular os esforços normais nas hastes A, B, C e D da treliça plana da figura 62.
- 54) Calcular os esforços normais nas hastes A, B, C e D da treliça plana da figura 63.
- 55) Calcular os esforços normais nas hastes A, B, C e D da treliça plana da figura 64.
- 56) Calcular os esforços normais nas hastes A, B, C e D da treliça plana da figura 65.
- 57) Calcular os esforços normais nas hastes A, B, C e D da treliça plana da figura 66.
- 58) Calcular os esforços normais nas hastes da treliça plana da figura 67.
- 59) Calcular os esforços normais nas hastes da treliça plana da figura 68.
- 60) Calcular os esforços normais nas hastes da treliça plana da figura 69.

- 61) Calcular os esforços normais nas hastes da treliça plana da figura 70.
- 62) Calcular os esforços normais nas hastes da treliça plana da figura 71.
- 63) Calcular os esforços normais nas hastes da treliça plana da figura 72.
- 64) Calcular os esforços normais nas hastes da treliça espacial da figura 73. A carga está contida no plano XOY.
- 65) Calcular os esforços normais nas hastes da treliça espacial da figura 74. A carga 2 tf é paralela a AX e a carga 3 tf é paralela a AY.
- 66) Calcular os esforços normais nas hastes da treliça espacial da figura 75. A carga 2 tf está sobre DZ e a carga 3 tf é paralela ao eixo Y.
- 67) Calcular os esforços normais nas hastes da treliça espacial da figura 76. A carga é paralela ao eixo Z.
- 68) Calcular os esforços normais nas hastes da treliça espacial da figura 77. A carga está no plano XOY.
- 69) Calcular os esforços normais nas hastes da treliça espacial da figura 78. A carga 2 tf está sobre o eixo Z e a carga 1 tf é paralela ao eixo X.
- 70) Calcular os esforços normais nas hastes da treliça espacial da figura 79. A carga é paralela ao eixo Y.
- 71) Calcular os esforços normais nas hastes da treliça espacial da figura 80. As cargas são paralelas ao eixo Z.
- 72) Calcular os esforços normais nas hastes da treliça espacial da figura 81.
- 73) Traçar os diagramas de esforços cortantes e momentos fletores para a viga da figura 82.
- 74) Traçar os diagramas de esforços cortantes e momentos fletores para a viga da figura 83.

- 75) Traçar os diagramas de esforços cortantes e momentos fletores para a viga da figura 84.
- 76) Traçar os diagramas de esforços cortantes e momentos fletores para a viga da figura 85.
- 77) Traçar os diagramas de esforços cortantes e momentos fletores para a viga da figura 86.
- 78) Traçar os diagramas de esforços cortantes e momentos fletores para a viga da figura 87.
- 79) Traçar os diagramas de esforços cortantes e momentos fletores para a viga da figura 88.
- 80) Traçar os diagramas de esforços cortantes e momentos fletores para a viga da figura 89.
- 81) Para a viga da figura 90 traçar o diagrama de esforços cortantes.
- 82) Para a viga da figura 91 traçar o diagrama de esforços cortantes.
- 83) Para a viga da figura 92 traçar o diagrama de esforços cortantes.
- 84) Para a viga da figura 93 traçar o diagrama de esforços cortantes.
- 85) Para a viga da figura 94 traçar o diagrama de esforços cortantes.
- 86) Para a viga Gerber da figura 95 traçar o diagrama de esforços cortantes.
- 87) Traçar os diagramas de esforços cortantes e momentos fletores para a viga da figura 96.
- 88) Traçar os diagramas de esforços cortantes e momentos fletores para a viga da figura 97.
- 89) Traçar os diagramas de esforços cortantes e momentos fletores para a viga da figura 98.
- 90) Traçar os diagramas de esforços cortantes e momentos fletores para a viga da figura 99.

- 91) Traçar o diagrama de momentos fletores para a viga da figura 100.
- 92) Traçar o diagrama de momentos fletores para a viga da figura 101.
- 93) Traçar o diagrama de momentos fletores para a viga Gerber da figura 102.
- 94) Traçar o diagrama de momentos fletores para a viga Gerber da figura 103.
- 95) Traçar os diagramas de esforços normais, esforços cortantes e momentos fletores para o pórtico da figura 104.
- 96) Traçar o diagrama de momentos fletores para o pórtico da figura 105.
- 97) Para o pórtico da figura 106 traçar o diagrama de momentos fletores referente ao trecho CDE.
- 98) Para a estrutura da figura 107 traçar o diagrama de momentos fletores.
- 99) Traçar os diagramas de esforços normais, esforços cortantes e momentos fletores para o pórtico trirotulado da figura 108.
- 100) Traçar o diagrama de momentos fletores para o trecho BC do pórtico trirotulado da figura 109.
- 101) Traçar os diagramas de esforços normais e esforços cortantes para o pórtico trirotulado da figura 110.
- 102) Traçar o diagrama de esforços cortantes para a estrutura rotulada internamente, da figura 111.
- 103) Traçar o diagrama de esforços cortantes para a estrutura trirotulada da figura 112.
- 104) Para o arco da figura 113, traçar o diagrama de esforços normais.

- 105) Para o arco da figura 114, traçar os diagramas de esforços normais e esforços cortantes.
- 106) Para o arco da figura 115, traçar o diagrama de momentos fletores.
- 107) Para o arco da figura 116, traçar os diagramas de esforços normais, esforços cortantes e momentos fletores.
- 108) Para o arco da figura 117, traçar os diagramas de esforços normais, esforços cortantes e momentos fletores.
- 109) Para o arco da figura 118, traçar os diagramas de esforços normais, esforços cortantes e momentos fletores.
- 110) Traçar os diagramas de esforços normais, esforços cortantes e momentos fletores para a estrutura da figura 119.
- 111) Traçar os diagramas de esforços normais, esforços cortantes e momentos fletores para a estrutura da figura 120.
- 112) Traçar os diagramas de esforços normais, esforços cortantes e momentos fletores para a estrutura da figura 121.
- 113) Traçar os diagramas de esforços normais, esforços cortantes e momentos fletores para a estrutura da figura 122.
- 114) Traçar os diagramas de esforços normais e esforços cortantes para a estrutura da figura 123.
- 115) Traçar os diagramas de esforços cortantes e de momentos fletores para a estrutura da figura 124.
- 116) Traçar o diagrama de momentos fletores para a estrutura da figura 125.
- 117) Para a grelha engastada da figura 126 traçar os diagramas de esforços cortantes, momentos fletores e momentos torções.
- 118) Para a grelha engastada da figura 127 traçar os diagramas de esforços cortantes, momentos fletores e momentos torções.

- 119) Para a grelha engastada da figura 128 traçar os diagramas de esforços cortantes, momentos fletores e momentos torções.
- 120) Para a grelha apoiada da figura 129 traçar os diagramas de esforços cortantes, momentos fletores e momentos torções.
- 121) Para a grelha apoiada da figura 130 traçar os diagramas de esforços cortantes, momentos fletores e momentos torções.
- 122) Para a grelha apoiada da figura 131 traçar os diagramas de esforços cortantes, momentos fletores e momentos torções.
- 123) Para a estrutura espacial da figura 132 traçar os diagramas das solicitações.
- 124) Para a estrutura espacial da figura 133 traçar os diagramas das solicitações.
- 125) Para a estrutura espacial da figura 134 traçar os diagramas das solicitações.
